Functions

Installation and Operation

A wizard guides you through the installation as well as the configuration in a few steps. Logically arranged graphics and icons allow to capture events precisely and to initiate appropriate measures.

Importing Floor Plans of AutoCAD

You can import floor plans of AutoCAD as dwf-file. The software automatically allocates the detector list of the fire panel to the floor plan.

Authorizations

You can set up as many operators as required and classify them according to their tasks into one of the three authorization groups: Operator, installer or administrator. A maximum of two operators can be logged on to the system at the same time.

Zoom and Pan

These two functions offer a comfortable navigation in the floor plan. With the zoom function it is possible to increase or minimize specific areas. With the pan function the floor plan can be moved in any direction.

Event Logging

In the event log all procedures and actions are recorded. You can generate statistics, make backups, print the event log and search according to various criteria.

Connectivity

You can connect up to 2000 detection points and four panels to the FSM-2000. It is working with the fire panels FPA-5000, FPA-1200, UEZ 2000 LSN and BZ 500 LSN.
